1. Executive Summary

This report documents the On-Page SEO Audit and Optimization project carried out on **DreamLearn** (<https://dreamlearn.umacreates.com/>), an online learning website focused on creative and digital skills, as part of the Unified Mentor Digital Marketing program. The website is built on WordPress with the Astra theme, Elementor Free and Yoast SEO Free.

The project covered five pages: Home, About, Courses, Blog and Contact. Yoast SEO was installed and used to analyse each page. Keyword research was carried out through Google autocomplete, a primary focus keyphrase and supporting variations were selected for every page, and SEO titles and meta descriptions were written to match each page's content and search intent. Headings, URL structure, image ALT text, internal links, external links and overall content quality were reviewed, and the findings were recorded in a structured Google Sheets audit.

Work completed

- Installed and configured Yoast SEO and used its SEO and readability analysis for all five pages.
- Conducted keyword research and defined a focus keyphrase for each page.
- Optimized SEO titles and meta descriptions for all five pages.
- Improved headings and page copy where appropriate (About, Courses, Blog and Contact pages; introductory text on the Home page).
- Reviewed and improved image ALT text, including all 15 images on the Courses page.
- Added one relevant internal link from the Contact page to the Courses page.
- Reviewed URL structure and retained all existing URLs because they were already short, descriptive and readable.

Key audit findings

- The site has clear navigation, descriptive URLs, relevant course categories and a logical heading structure.
- The Courses page "Learn More" buttons do not yet link to dedicated course pages.
- The Blog page shows article cards, but individual blog posts have not been created, so the cards cannot link to posts.
- No external links were added, because links should be included only where they provide genuine value.
- Some Yoast recommendations (Blog text length, Contact subheading keyphrases and text length) were reviewed and intentionally not forced, as explained in the relevant sections.

Scope of this report

This report describes on-page SEO work only. It does not include ranking, traffic, click, backlink or conversion data, and it makes no claim that search performance has improved. Search performance should be monitored over time using Google Search Console.

2. Project Overview

2.1 About DreamLearn

DreamLearn is an online learning website focused primarily on creative and digital skills. Its main learning areas are Graphic Design, Web Design, UI/UX Design, VFX & Motion Graphics and Digital Marketing. The main navigation consists of Home, About DreamLearn, Courses, Blog and Contact.

Platform	WordPress
Theme	Astra
Page builder	Elementor (Free)
SEO plugin	Yoast SEO (Free)

2.2 Project Objectives

The project objectives, and the sections of this report in which each is addressed, are listed below.

#	Objective	Report section
1	Conduct an on-page SEO audit of the DreamLearn website	6, 13, 15
2	Install and configure Yoast SEO	4
3	Analyze SEO titles and meta descriptions	6, 7
4	Conduct keyword research	5
5	Select primary keywords and keyword variations	5
6	Optimize SEO titles and meta descriptions	7
7	Review URL structure	8
8	Review heading structure	9
9	Optimize image ALT text	10
10	Review internal linking	11
11	Review external linking	12
12	Assess content quality	13
13	Document SEO findings and recommendations	15, 16
14	Prepare a structured SEO audit report	This report; Google Sheets

2.3 Pages Audited

Page	URL
Home	https://dreamlearn.umacreates.com/
About	https://dreamlearn.umacreates.com/about-dreamlearn/
Courses	https://dreamlearn.umacreates.com/courses/
Blog	https://dreamlearn.umacreates.com/blog/
Contact	https://dreamlearn.umacreates.com/contact/

2.4 Tools Used

Tool	Purpose
WordPress	Website management
Elementor	Page editing and optimization
Astra Theme	Website theme
Yoast SEO	On-page SEO analysis
Google Search	Keyword research and autocomplete
Google Sheets	SEO audit documentation
Microsoft Word / Google Docs	Project report
GitHub	Project documentation and submission

2.5 Scope and Limitations

- The findings describe the website as it was during this project and relate to on-page SEO only.
- Keyword research used Google autocomplete suggestions. Search volume and keyword difficulty data were not collected, and none is reported.
- No Google Search Console performance data, rankings, traffic or backlink data are included.
- Content quality scores are qualitative assessments, not Yoast scores or industry benchmarks.
- The free versions of Yoast SEO and Elementor were used, which affects some analysis behaviour (see Sections 6.4 and 6.5).

3. Methodology

The audit followed a structured, page-by-page process. Each stage produced documentation that was recorded in the Google Sheets audit workbook.

Step	Stage	Activity	Output
1	Initial review	Reviewed the five pages, their navigation, content and existing SEO elements.	Baseline observations
2	Tool setup	Installed and configured Yoast SEO and enabled its SEO and readability analysis.	Yoast analysis per page
3	Keyword research	Used Google autocomplete to find relevant search phrases for each page.	Keyword research sheet
4	Keyword selection	Selected a primary keyphrase and variations for each page based on relevance and search intent.	Focus keyphrases
5	Metadata optimization	Wrote SEO titles and meta descriptions aligned with each page and its keyphrase.	Optimized metadata
6	On-page review	Reviewed URLs, headings, image ALT text, internal links, external links and body content.	Page-level findings
7	Content assessment	Scored each page out of 10 using defined criteria (Section 13).	Quality scores
8	Documentation	Recorded findings and recommendations in Google Sheets and compiled this report.	Audit sheet and report

Guiding principles

- **Search intent first.** Keywords were chosen to match what each page actually offers, not simply to maximize volume.
- **Natural language.** Keywords were used naturally in titles, headings and copy; keyword stuffing was avoided.
- **Genuine value.** Links, images and extra text were added only when they helped users, not solely to turn a Yoast indicator green.
- **Accuracy.** Only completed work is presented as completed; limitations and open items are stated explicitly.

4. Yoast SEO Implementation

Yoast SEO was installed and used as the primary analysis tool for this project. The plugin installed was **Yoast SEO – Advanced SEO with real-time guidance and built-in AI**.

4.1 Features Reviewed and Configured

Feature	Relevance to this project
SEO Analysis	Evaluates each page against its focus keyphrase and gives on-page recommendations.
Readability Analysis	Assesses sentence length, structure and clarity of the page copy.
XML Sitemaps	Provides a sitemap that helps search engines discover the site's pages.
Schema Framework	Outputs structured data describing the site and its pages.
Open Graph data	Controls how pages appear when shared on social platforms.
X card data	Controls how pages appear when shared on X.
Text link counter	Counts internal and outgoing links within page content.
Schema Aggregation Endpoint	Yoast schema-related feature reviewed in the plugin settings.

4.2 Site Representation

Site represents	Organization
Organization name	DreamLearn

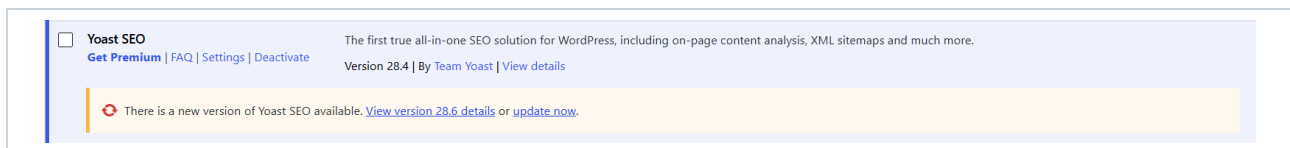

Figure: Yoast SEO installed and active in the WordPress plugins list

4.3 How Yoast Was Used

Yoast's analysis was treated as guidance rather than a target score. Where a recommendation improved the page for users, it was implemented. Where a recommendation was unnecessary or unsuitable for the page type, it was reviewed and intentionally not implemented, with the reasoning documented (see Sections 6.4 and 6.5).

5. Keyword Research

Keyword research was conducted using Google autocomplete suggestions. For each page, a primary keyphrase and a small set of variations were selected based on relevance to the page's content and likely search intent.

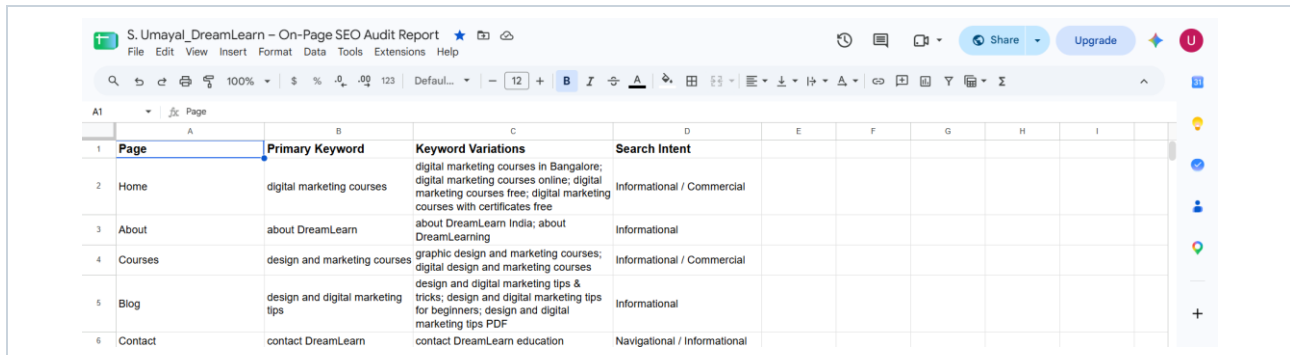

Page	Primary keyword	Variations	Search intent
Home	digital marketing courses	digital marketing courses in Bangalore digital marketing courses online digital marketing courses free digital marketing courses with certificates free	Informational / Commercial
About	about DreamLearn	about DreamLearn India about DreamLearning	Informational
Courses	design and marketing courses	graphic design and marketing courses digital design and marketing courses	Informational / Commercial
Blog	design and digital marketing tips	design and digital marketing tips & tricks design and digital marketing tips for beginners design and digital marketing tips PDF	Informational
Contact	contact DreamLearn	contact DreamLearn education	Navigational / Informational

5.1 Keyword Selection Notes

- Autocomplete suggestions that implied claims DreamLearn does not make, or purposes that do not match the website (for example, placement guarantees, degree programmes or user login), were not used as targets.
- The Courses keyphrase was framed around “courses” rather than degrees, because DreamLearn provides courses, not degree programmes.
- The Contact page targets a navigational phrase because visitors searching for it are looking for a way to reach DreamLearn.
- Variations are supporting phrases to be used naturally where they fit the content; they were not repeated for density.

Note on data

Autocomplete suggestions indicate phrases people search for but do not provide search volume. No volume or difficulty figures are reported in this document.

The screenshot shows a Google Sheet with the following data:

Page	Primary Keyword	Keyword Variations	Search Intent
Home	digital marketing courses	digital marketing courses in Bangalore; digital marketing courses online; digital marketing courses free; digital marketing courses with certificates free	Informational / Commercial
About	about DreamLearn	about DreamLearn India; about DreamLearning	Informational
Courses	design and marketing courses	graphic design and marketing courses; digital design and marketing courses	Informational / Commercial
Blog	design and digital marketing tips	design and digital marketing tips & tricks; design and digital marketing tips for beginners; design and digital marketing tips PDF	Informational
Contact	contact DreamLearn	contact DreamLearn education	Navigational / Informational

Figure: Keyword research documented in Google Sheets

6. Page-by-Page SEO Audit

Each page is presented with a snapshot of its key SEO elements, followed by the work completed, audit findings and recommendations. These categories are kept separate so that completed work is not confused with future suggestions.

6.1 Home Page

URL	https://dreamlearn.umacreates.com/
Primary keyword	digital marketing courses
SEO title	Digital Marketing Courses DreamLearn
Meta description	Digital marketing courses, graphic design, web design, UI/UX and VFX at DreamLearn. Build practical skills for your creative career.
Content quality score	8/10

Work completed

- Defined the focus keyphrase and optimized the SEO title and meta description.
- Optimized the introductory content to read: “Explore practical digital marketing courses and creative skills at DreamLearn. Learn at your own pace and build skills for your career.”
- Reviewed the image ALT text on the page.

Image ALT text reviewed

#	ALT text
1	Digital marketing courses and fundamentals
2	Web design courses and fundamentals
3	Student learning online with a laptop
4	Data analytics course
5	Student using a pen tablet and laptop for creative design

Audit findings

- A single H1 and relevant supporting headings were reviewed.
- Internal links are provided by the existing navigation.
- No external links were added artificially.

Yoast SEO analysis summary

Problems (2)	No outbound links on the page; keyphrase not used in H2/H3 subheadings.
Improvements (1)	Only 1 of 5 images has ALT text reflecting the keyphrase topic.
Good results	13, including keyphrase in the SEO title, meta description and introduction.
Text length	421 words.

Recommendation

Continue improving image ALT text where appropriate and add authoritative external resources only when genuinely useful.

The screenshot displays the Yoast SEO interface for the 'Digital Marketing Courses | DreamLearn' page. On the left, the 'Focus keyphrase' is set to 'digital marketing courses'. The 'Search appearance' section shows a 'Google preview' of the page's search results. The 'SEO title' is 'Digital Marketing Courses | DreamLearn' and the 'Meta description' is 'Digital marketing courses, graphic design, web design, UI/UX and VFX at DreamLearn. Build practical skills for your creative career.' On the right, the 'Analysis results' panel shows 2 problems, 1 improvement, and 13 good results. The problems include 'Outbound links' and 'Keyphrase in subheading'. The improvements include 'Keyphrase in image alt attributes'. The good results include 'Images', 'Internal links', 'Keyphrase in introduction', 'Keyphrase density', 'Keyphrase in SEO title', 'Keyphrase length', 'Keyphrase in meta description', 'Meta description length', 'Previously used keyphrase', 'Single title', 'Competing links', 'Text length', and 'SEO title width'.

Figure: Home page – Yoast SEO settings (left) and analysis (right)

The screenshot shows the live DreamLearn home page. The header features the DreamLearn logo and navigation links: Home, About, Blog, Contact. The main content area has a large heading 'Learn. Grow. Achieve.' with a subheading 'Explore practical digital marketing courses and creative skills at DreamLearn. Learn at your own pace and build skills for your career.' and a 'Start Exploring' button. Below this is another heading 'Learn. Practice. Grow.' with a subheading 'Learning becomes more meaningful when knowledge can be applied in real life. DreamLearn helps learners discover practical skills through simple, structured and engaging online learning experiences.' The bottom section is titled 'Explore Digital Marketing Courses' with a subheading 'Build practical skills through simple, structured and beginner-friendly online learning.' It features three course cards: 'Digital Marketing Fundamentals', 'Data Analytics Essentials', and 'Web Design Basics', each with a 'Learn More' button.

Figure: Live DreamLearn home page

6.2 About Page

URL	https://dreamlearn.umacreates.com/about-dreamlearn/
Primary keyword	about DreamLearn
SEO title	About DreamLearn Learn. Grow. Achieve.
Meta description	Learn about DreamLearn, an online learning platform focused on graphic design, web design, UI/UX, VFX and digital marketing skills.
Content quality score	9/10

Work completed

- Defined the focus keyphrase and optimized the SEO title and meta description.
- Added the heading **About DreamLearn**.
- Added the sentence “Our goal is practical and creative learning.”
- Added descriptive ALT text to the page image: “Creative learning and design skills at DreamLearn”.

Audit findings

- Internal links are provided by the site navigation.
- No external links were added artificially.

Yoast SEO analysis summary

Problems (2)	No outbound links on the page; keyphrase not used in H2/H3 subheadings.
Improvements	None listed.
Good results	15, including keyphrase in the SEO title, meta description, introduction and slug.
Text length	303 words.

Recommendation

Add an authoritative external resource only if it is naturally useful.

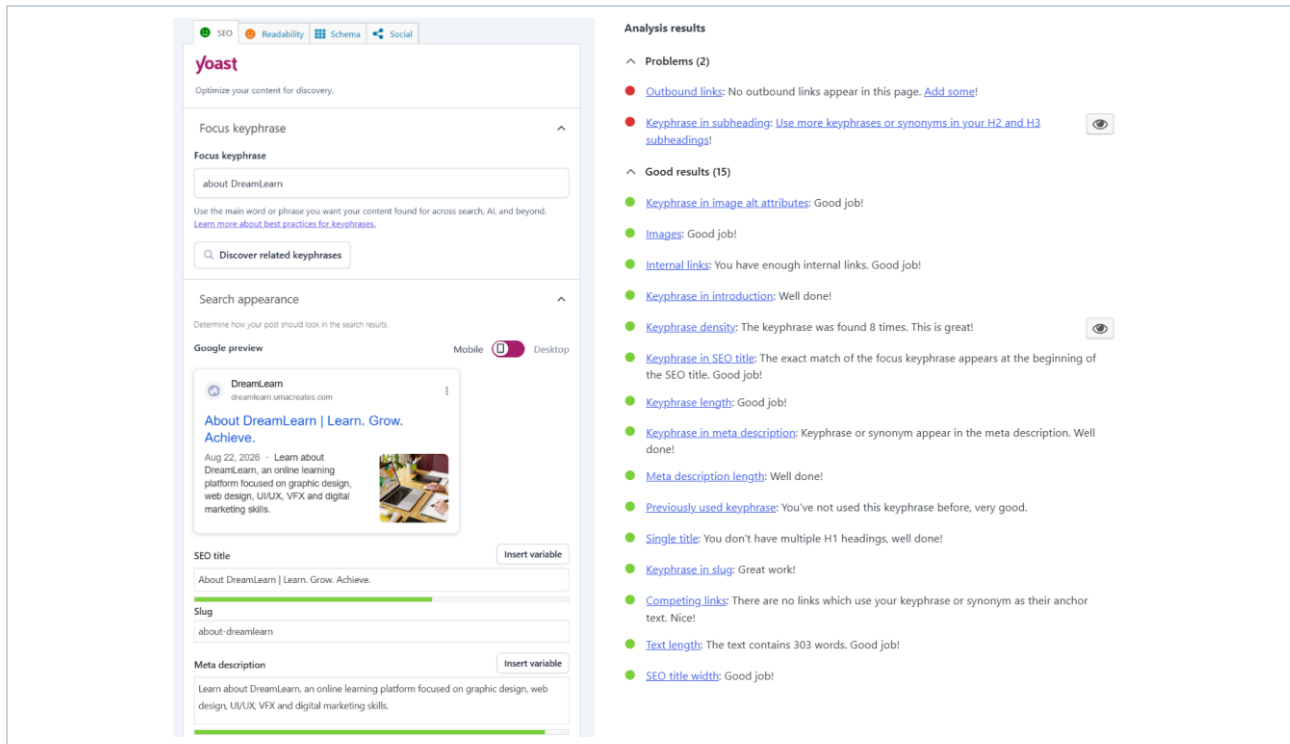

Figure: About page – Yoast SEO settings (left) and analysis (right)

6.3 Courses Page

URL	https://dreamlearn.umacreates.com/courses/
Primary keyword	design and marketing courses
SEO title	Design and Marketing Courses DreamLearn
Meta description	Explore design and marketing courses at DreamLearn, including graphic design, web design, UI/UX, VFX and digital marketing skills.
Content quality score	9/10

Work completed

- Defined the focus keyphrase and optimized the SEO title and meta description.
- Added the heading **Design and Marketing Courses at DreamLearn**.
- Added supporting content: “DreamLearn offers design and marketing courses including graphic design, web design, UI/UX, VFX, and digital marketing programs.”
- Reviewed all 15 images on the page and gave them descriptive ALT text.

Current main headings

- Design and Marketing Courses at DreamLearn
- Graphic Design
- Web Design
- UI/UX Design
- VFX & Motion Graphics
- Digital Marketing

- Start Building Your Skills Today

Selected ALT text examples

Person drawing on a digital tablet for design work
Creative design workspace with laptop and sketch supplies
Web design concepts on a grid background
Wireframe sketches and smartphone for UI/UX design
Green screen setup for visual effects work
Team collaborating on digital marketing strategies
SEO concepts representing digital marketing
Social media marketing concept with vintage camera

Audit findings

- Main navigation links are present.
- **Limitation:** the “Learn More” buttons do not currently link to dedicated individual course pages.
- No external links were added artificially.

Yoast SEO analysis summary

Problems (2)	No outbound links on the page; keyphrase not used in H2/H3 subheadings.
Improvements (2)	Yoast suggests more keyphrase words in image ALT text (ALT text was kept descriptive rather than repeating the keyphrase on every image); part of the keyphrase is not in the slug (/courses/ was retained).
Good results	13.
Text length	387 words.

Recommendation

Create dedicated pages for the individual course categories in the future and connect the “Learn More” buttons to those pages.

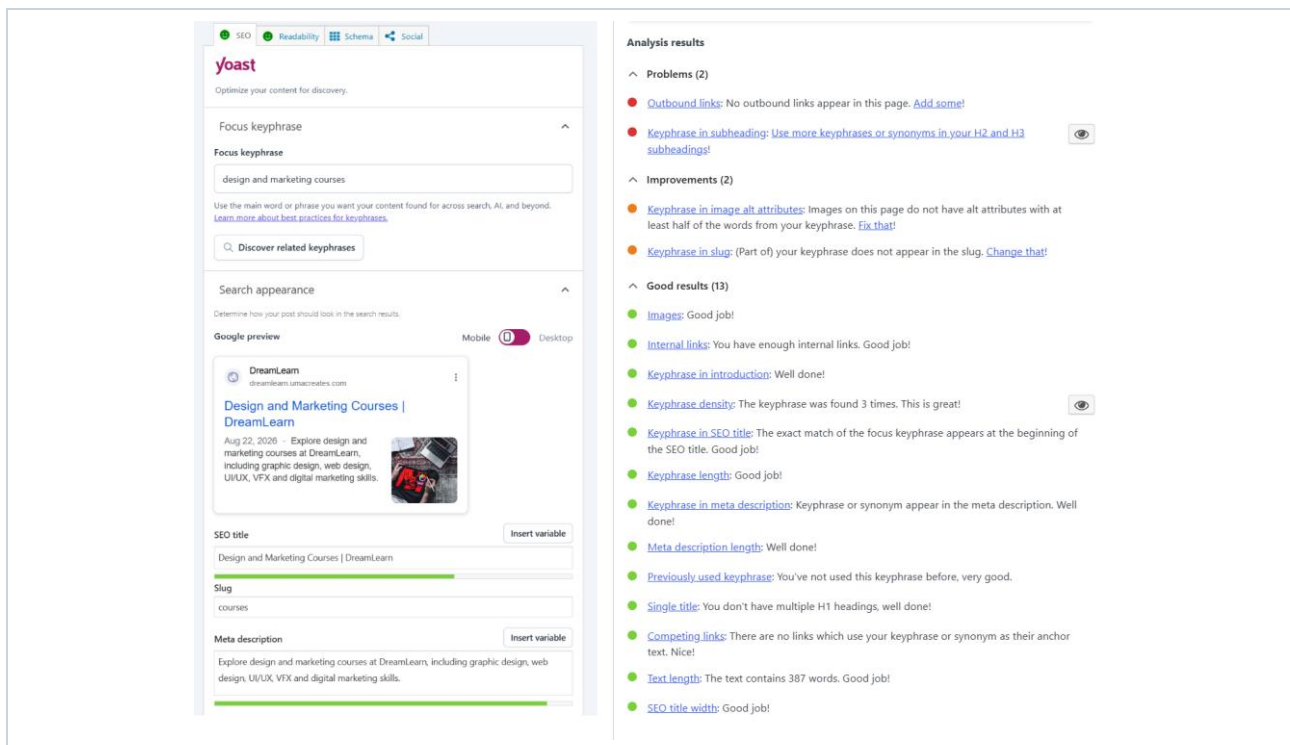

Figure: Courses page – Yoast SEO settings (left) and analysis (right)

6.4 Blog Page

URL	https://dreamlearn.umacreates.com/blog/
Primary keyword	design and digital marketing tips
SEO title	Design and Digital Marketing Tips DreamLearn
Meta description	Get practical design and digital marketing tips, insights and ideas to build creative skills and stay updated with the digital world.
Content quality score	8/10

Page content

The page currently displays three article cards:

- What is Digital Marketing, and Why Does It Matter?
- 5 Essential SEO Tips for Beginners
- How to Build a Strong Design Portfolio

Important limitation

These are article cards only. Individual blog posts have **not** been created.

Work completed

- Defined the focus keyphrase and optimized the SEO title and meta description.
- Expanded the page content with useful information covering digital marketing, SEO, web design, UI/UX, graphic design, visual effects, portfolio development and practical learning.

- Reviewed and improved image ALT text. One image previously had excessive keyword repetition in its ALT text; this was replaced with a concise descriptive ALT text (see Section 10).

Audit findings

- Because individual posts do not exist, the article cards cannot link to dedicated posts.
- No external links were added artificially.
- Yoast text-length warning:** Yoast continued to display a text-length warning because it did not count all Elementor-rendered content as expected. Yoast reports 170 words, so the page is not reported as meeting the 300-word threshold according to Yoast.

Yoast SEO analysis summary

Problems (5)	No outbound links; no internal links in the page content; keyphrase appears 3 times (Yoast's recommended maximum for this text length is 2); keyphrase not used in H2/H3 subheadings; text length 170 words (Yoast recommends at least 300).
Improvements (1)	Part of the keyphrase is not in the slug (/blog/ was retained).
Good results	11.

Recommendation

Create individual blog posts and connect each article card to its corresponding post. Add internal links between relevant blog posts and course pages, and review keyphrase repetition when the content is next edited.

The screenshot displays the Yoast SEO interface for a blog post. On the left, the 'SEO' tab is active, showing the 'Focus keyphrase' as 'design and digital marketing tips'. Below this, there's a 'Search appearance' section with a 'Google preview' of the post. The 'SEO title' is 'Design and Digital Marketing Tips | DreamLearn', the 'Slug' is 'blog', and the 'Meta description' is 'Get practical design and digital marketing tips, insights and ideas to build creative skills and stay updated with the digital world.' On the right, the 'Analysis results' section lists 5 problems and 11 good results. The problems include missing outbound and internal links, keyphrase density, keyphrase in subheading, and text length. The good results include keyphrase in image alt attributes, images, keyphrase in introduction, keyphrase in SEO title, keyphrase length, keyphrase in meta description, meta description length, previously used keyphrase, single title, competing links, and SEO title width.

Figure: Blog page – Yoast SEO settings (left) and analysis (right)

6.5 Contact Page

URL	https://dreamlearn.umacreates.com/contact/
Primary keyword	contact DreamLearn
SEO title	Contact DreamLearn Get in Touch
Meta description	Contact DreamLearn to learn more about our design, web design, UI/UX, VFX and digital marketing courses and learning opportunities.
Content quality score	8/10

Work completed

- Defined the focus keyphrase and optimized the SEO title and meta description.
- Added the introduction text, which includes the sentence “Contact DreamLearn to learn more about our design and digital marketing courses and learning opportunities.”
- Added the heading **Contact DreamLearn** as an **H2**.
- Added an internal link to the Courses page using the anchor text “design and digital marketing courses”.

Audit findings and Yoast recommendations reviewed

Item	Decision and reasoning
URL	The URL /contact/ was intentionally retained because it is short, clear, readable and standard.
Subheading keyphrase warning	Yoast continued to show “Use more keyphrases or synonyms in your H2 and H3 subheadings.” The exact focus keyphrase “contact DreamLearn” is already present in the H2, so no extra heading was added solely to satisfy this indicator.
Text length	The page contains 124 words. It was not artificially expanded to 300 words, because a Contact page does not need unnecessary content.
Slug	Yoast lists “part of your keyphrase does not appear in the slug” as an improvement. The short, standard /contact/ URL was kept.
Images	No image was added simply to satisfy Yoast.
External links	No artificial external link was added.

Recommendation

Maintain the clean /contact/ URL and the existing internal link. Avoid adding unnecessary text, images or external links solely to satisfy Yoast.

The screenshot shows the Yoast SEO interface for the 'Contact DreamLearn' page. On the left, the 'Focus keyphrase' is 'contact DreamLearn'. The 'Search appearance' section shows a mobile preview of the page with the title 'Contact DreamLearn | Get in Touch' and a meta description. On the right, the 'Analysis results' section lists 5 problems and 11 good results.

Problems (5)

- Outbound links:** No outbound links appear in this page. [Add some!](#)
- Keyphrase in image alt attributes:** This page does not have images, a keyphrase, or both. [Add some images with alt attributes that include the keyphrase or synonyms!](#)
- Images:** No images appear on this page. [Add some!](#)
- Keyphrase in subheading:** Use more keyphrases or synonyms in your H2 and H3 subheadings!
- Text length:** The text contains 124 words. This is far below the recommended minimum of 300 words. [Add more content.](#)

Improvements (1)

- Keyphrase in slug:** (Part of) your keyphrase does not appear in the slug. [Change that!](#)

Good results (11)

- Internal links:** You have enough internal links. Good job!
- Keyphrase in introduction:** Well done!
- Keyphrase density:** The keyphrase was found 1 time. This is great!
- Keyphrase in SEO title:** The exact match of the focus keyphrase appears at the beginning of the SEO title. Good job!
- Keyphrase length:** Good job!
- Keyphrase in meta description:** Keyphrase or synonym appear in the meta description. Well done!
- Meta description length:** Well done!
- Previously used keyphrase:** You've not used this keyphrase before, very good.
- Single title:** You don't have multiple H1 headings, well done!
- Competing links:** There are no links which use your keyphrase or synonym as their anchor text. Nice!
- SEO title width:** Good job!

Figure: Contact page – Yoast SEO settings (left) and analysis (right)

The screenshot shows the live 'Contact' page on the DreamLearn website. The page has a dark blue header with the DreamLearn logo and navigation links: Home, About, Courses, Blog, Contact, and social media icons. The main content area has a light blue background with the title 'Contact DreamLearn' and a paragraph of text. The text includes an underlined link 'design and digital marketing courses'.

Contact

Contact DreamLearn

Have a question or want to learn more about DreamLearn? Get in touch with us, and we'll be happy to help you take the next step in your learning journey. Contact DreamLearn to learn more about our [design and digital marketing courses](#) and learning opportunities.

Figure: Live Contact page – the internal link is the underlined text “design and digital marketing courses”

7. Meta Tag Optimization

SEO titles and meta descriptions were optimized according to each page's relevance, search intent and keyword targeting. Each title leads with the page's primary keyphrase or topic, and each description summarizes the page accurately without making claims DreamLearn cannot support.

Page	SEO Title	Meta Description
Home	Digital Marketing Courses DreamLearn	Digital marketing courses, graphic design, web design, UI/UX and VFX at DreamLearn. Build practical skills for your creative career.
About	About DreamLearn Learn. Grow. Achieve.	Learn about DreamLearn, an online learning platform focused on graphic design, web design, UI/UX, VFX and digital marketing skills.
Courses	Design and Marketing Courses DreamLearn	Explore design and marketing courses at DreamLearn, including graphic design, web design, UI/UX, VFX and digital marketing skills.
Blog	Design and Digital Marketing Tips DreamLearn	Get practical design and digital marketing tips, insights and ideas to build creative skills and stay updated with the digital world.
Contact	Contact DreamLearn Get in Touch	Contact DreamLearn to learn more about our design, web design, UI/UX, VFX and digital marketing courses and learning opportunities.

8. URL Structure Audit

All five URLs were reviewed for length, readability and descriptiveness.

Page	URL	Evaluation
Home	/	Good — standard root URL
About	/about-dreamlearn/	Good — descriptive and readable
Courses	/courses/	Good — short and descriptive
Blog	/blog/	Good — clear and standard
Contact	/contact/	Good — short and descriptive

No unnecessary URL changes were made. Changing working URLs without a clear benefit can create redirect and indexing complications, so all existing URLs were retained. Yoast listed “part of your keyphrase does not appear in the slug” as an improvement for the Courses, Blog and Contact pages; the existing short slugs were kept.

9. Heading Optimization

The H1/H2/H3 structure of each page was reviewed. Relevant headings were improved, keywords were used naturally, and keyword stuffing was avoided.

Key headings

Page	Important heading
About	About DreamLearn
Courses	Design and Marketing Courses at DreamLearn
Contact	Contact DreamLearn (H2)

The Home page was found to have a single H1 with relevant supporting headings. The Courses page uses the main heading followed by one heading for each course category and a closing call-to-action heading.

10. Image Optimization

Images were reviewed for descriptive ALT text. ALT text was written to describe what each image actually shows, which supports accessibility and gives search engines useful context. Keyword stuffing was avoided.

Page	Image work completed
Home	Images reviewed; ALT text recorded for five images (Section 6.1).
About	Descriptive ALT text added to the page image.
Courses	All 15 images reviewed and given descriptive ALT text.
Blog	ALT text reviewed and improved, including replacement of a keyword-stuffed ALT text.
Contact	No image added; none was needed.

Before and after example

	ALT text
Before	search engine optimization, seo, digital marketing, laptop, online job, seo, seo, seo, seo, seo, digital marketing
After	[Insert the exact replacement ALT text used on the Blog page image]

The “Before” text repeats keywords and lists terms rather than describing the image. The replacement describes the image concisely. Examples of the descriptive style used elsewhere in the project include “SEO concepts representing digital marketing” and “Team collaborating on digital marketing strategies” (Courses page).

Scope

ALT text was reviewed or improved on the Home, About, Courses and Blog pages as described above. This report does not claim that every image across the entire website was optimized.

11. Internal Linking Strategy

11.1 Current State

Area	Status
Main navigation	Already provides internal links between the five main pages.
Contact page	A relevant internal link to the Courses page was added (completed work).
Courses page	Navigation links are present, but the “Learn More” buttons do not yet lead to dedicated course pages.
Blog page	Article cards do not yet connect to individual posts, because individual posts have not been created.

11.2 Recommended Future Strategy

The following link paths are recommendations for future work, not completed changes.

Link path	Purpose
Blog → Courses	Guide readers from educational articles to the relevant course category.
Blog → related Blog posts	Keep readers engaged and show topical relationships between articles.
Courses → individual course pages	Give each course category a dedicated, indexable destination.
About → Courses	Move visitors from the brand story to what DreamLearn offers.
Contact → Courses	Already implemented; maintain it.

12. External Linking

External linking was reviewed on every page, and **no external links were added artificially**. External links should provide genuine value to readers and should not be inserted merely to make a Yoast indicator green.

Future opportunities include linking to authoritative SEO, design, digital marketing or educational resources when they are contextually appropriate, for example within future blog posts.

13. Content Quality Assessment

Each page was scored out of 10 in a qualitative assessment based on relevance, readability, content structure, keyword implementation, topic coverage and user intent.

Page	Score	Assessment focus
Home	8/10	Clear course focus; ALT text and external resources can still be strengthened.
About	9/10	Clear heading and purpose; relevant metadata.
Courses	9/10	Strong topic coverage and structure; course pages still to be built.
Blog	8/10	Relevant topics; individual posts still to be created.
Contact	8/10	Clean and concise; appropriate for the page type.

These scores are the author's assessment and are separate from the Yoast SEO and readability indicators.

14. Before vs After Comparison

Area	Before	After
Yoast SEO	Not configured for this audit	Installed and used for analysis
Focus keywords	Not consistently defined	Defined for all five pages
SEO titles	Required optimization	Optimized
Meta descriptions	Missing/under-optimized on some pages	Added/optimized
Headings	Reviewed	Improved where appropriate
Image ALT text	Some images required improvement	Relevant ALT text reviewed/added
Internal linking	Mainly navigation-based	Additional relevant internal link added
Keyword research	Not documented	Completed
URL structure	Existing URLs	Reviewed and retained where appropriate
SEO documentation	Not available	Completed in Google Sheets

15. Key Findings

15.1 Strengths

- Clear website navigation
- Descriptive URLs
- Relevant course categories
- Optimized metadata
- Defined focus keywords
- Improved image ALT text
- Logical heading structure
- Basic internal linking foundation

15.2 Areas for Improvement

- Create dedicated course pages.
- Connect the “Learn More” buttons to those pages.
- Create actual individual blog posts.
- Strengthen contextual internal linking.
- Add authoritative external resources only where useful.
- Continue monitoring SEO performance.
- Keep website content aligned with the Design and Marketing positioning.

16. Future Recommendations

The items below are recommendations for future work and have not been implemented as part of this project.

16.1 Dedicated Course Pages

Create an individual page for each course category:

- Graphic Design
- Web Design
- UI/UX Design
- VFX & Motion Graphics
- Digital Marketing

16.2 Blog Strategy

Create SEO-focused articles around:

- Digital marketing for beginners
- SEO tips for beginners
- Design portfolio development
- Web design fundamentals
- UI/UX principles

- Graphic design tips
- Digital marketing career skills

16.3 Internal Linking

Connect relevant blog articles with course pages and with related articles, following the link paths in Section 11.2.

16.4 Search Performance Monitoring

Use Google Search Console to monitor the following over time:

- Impressions
- Clicks
- Average position
- CTR
- Search queries
- Indexing

No Search Console results are reported in this document.

17. Project Outcomes

The project resulted in the following deliverables:

#	Outcome
1	Yoast SEO implementation
2	Five-page SEO audit
3	Keyword research
4	Optimized SEO titles
5	Optimized meta descriptions
6	Focus keyphrase implementation
7	Heading review
8	Image ALT text optimization
9	Internal linking improvement
10	URL review
11	External linking assessment
12	Content quality assessment
13	Future SEO recommendations
14	Structured Google Sheets documentation

18. Conclusion

This project provided practical experience in applying on-page SEO techniques to a live WordPress website. Working through keyword research, metadata, headings, images, links and content on the DreamLearn website showed how each element contributes to a page that is clear to both users and search engines.

The project also demonstrated that effective SEO is not simply about making every Yoast indicator green. Good optimization takes into account:

- Search intent
- Relevance
- User experience
- Content quality
- Website structure
- Accessibility
- Sustainable SEO practices

DreamLearn now has a stronger on-page SEO foundation. Future improvements should focus on dedicated course pages, actual blog posts, stronger internal linking, authoritative external resources where they add value, and ongoing performance monitoring through Google Search Console.

20. Screenshots and Evidence

The screenshots below support the audit and optimization work described in this report. They were taken from the DreamLearn WordPress dashboard, the live website and the Google Sheets audit workbook.

Evidence 1: Yoast SEO plugin installation

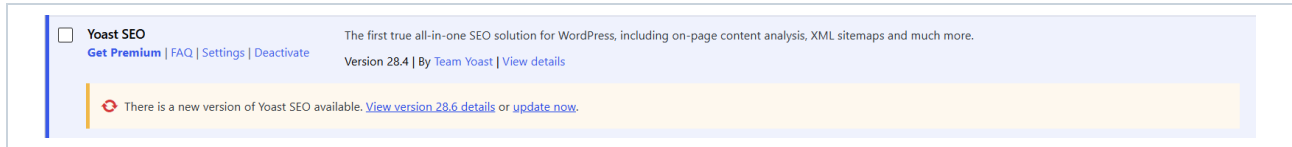

Figure 1: Yoast SEO plugin installed in the WordPress dashboard

Evidence 2: Yoast SEO configuration

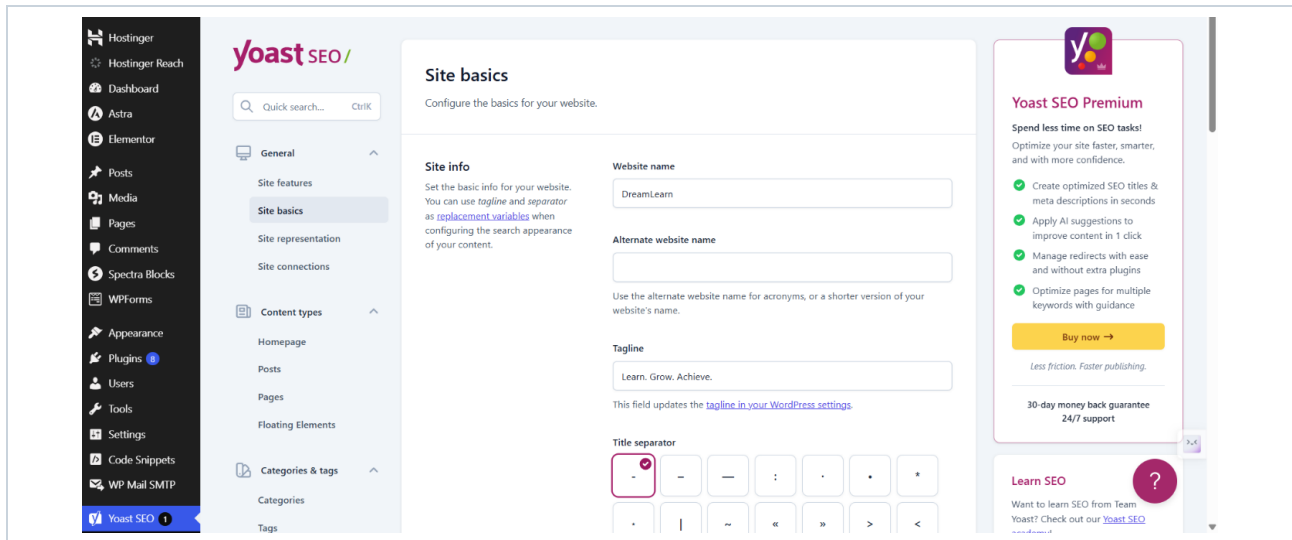

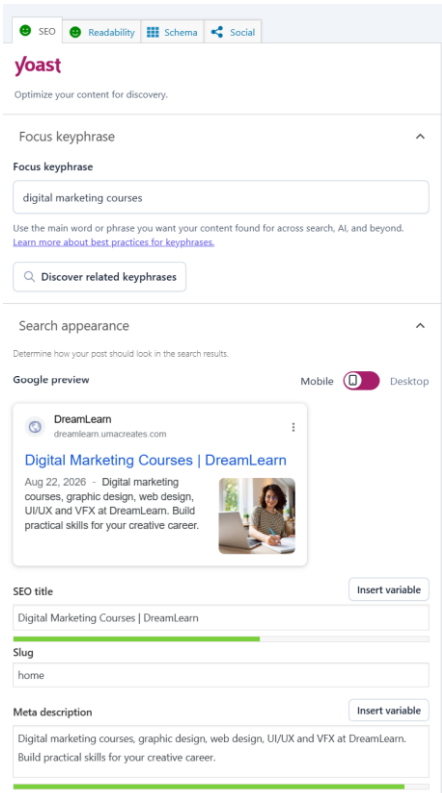

Figure 2: Yoast SEO settings (Site basics) for the DreamLearn site

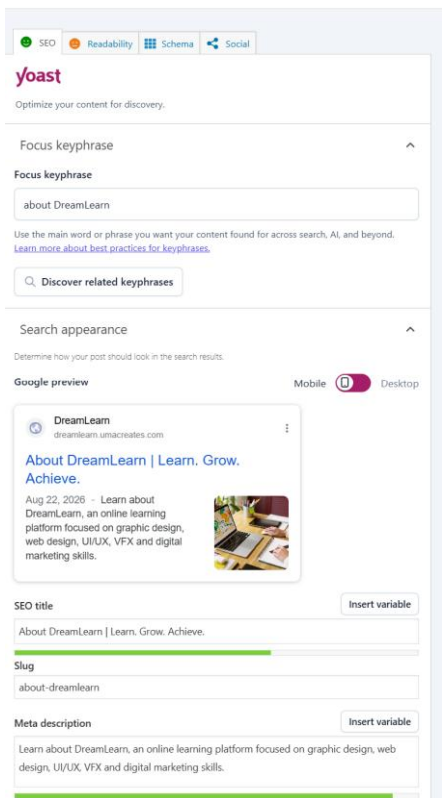

Evidence 3: Home page SEO optimization

The screenshot shows the Yoast SEO interface for the Home page. At the top, there are tabs for SEO, Readability, Schema, and Social. The main heading is "yoast" with the tagline "Optimize your content for discovery." Below this, the "Focus keyphrase" section is active, showing the keyphrase "digital marketing courses" in a text box. A note below the text box says "Use the main word or phrase you want your content found for across search, AI, and beyond. [Learn more about best practices for keyphrases.](#)" and a button "Discover related keyphrases" is present. The "Search appearance" section is also active, showing a "Google preview" of the page. The preview shows the DreamLearn logo, the title "Digital Marketing Courses | DreamLearn", the date "Aug 22, 2026", and a brief description. Below the preview, the "SEO title" is set to "Digital Marketing Courses | DreamLearn" and the "Slug" is "home". The "Meta description" is "Digital marketing courses, graphic design, web design, UI/UX and VFX at DreamLearn. Build practical skills for your creative career." and is highlighted with a green bar.

Figure 3: Home page Yoast focus keyphrase, SEO title and meta description

Evidence 4: About page SEO optimization

The screenshot shows the Yoast SEO interface for the About page. At the top, there are tabs for SEO, Readability, Schema, and Social. The main heading is "yoast" with the tagline "Optimize your content for discovery." Below this, the "Focus keyphrase" section is active, showing the keyphrase "about DreamLearn" in a text box. A note below the text box says "Use the main word or phrase you want your content found for across search, AI, and beyond. [Learn more about best practices for keyphrases.](#)" and a button "Discover related keyphrases" is present. The "Search appearance" section is also active, showing a "Google preview" of the page. The preview shows the DreamLearn logo, the title "About DreamLearn | Learn. Grow. Achieve.", the date "Aug 22, 2026", and a brief description. Below the preview, the "SEO title" is set to "About DreamLearn | Learn. Grow. Achieve." and the "Slug" is "about-dreamlearn". The "Meta description" is "Learn about DreamLearn, an online learning platform focused on graphic design, web design, UI/UX, VFX and digital marketing skills." and is highlighted with a green bar.

Figure 4: About page Yoast focus keyphrase, SEO title and meta description

Evidence 5: Courses page SEO optimization

The screenshot shows the Yoast SEO interface for the 'Courses' page. At the top, there are tabs for SEO, Readability, Schema, and Social. The 'Focus keyphrase' section contains the text 'design and marketing courses' and a button to 'Discover related keyphrases'. The 'Search appearance' section shows a 'Google preview' of the page, which includes the DreamLearn logo, the title 'Design and Marketing Courses | DreamLearn', the date 'Aug 22, 2026', and a brief description. Below the preview, the 'SEO title' is 'Design and Marketing Courses | DreamLearn', the 'Slug' is 'courses', and the 'Meta description' is 'Explore design and marketing courses at DreamLearn, including graphic design, web design, UI/UX, VFX and digital marketing skills.'.

Figure 5: Courses page Yoast focus keyphrase, SEO title and meta description

Evidence 6: Blog page SEO optimization

The screenshot shows the Yoast SEO interface for the 'Blog' page. At the top, there are tabs for SEO, Readability, Schema, and Social. The 'Focus keyphrase' section contains the text 'design and digital marketing tips' and a button to 'Discover related keyphrases'. The 'Search appearance' section shows a 'Google preview' of the page, which includes the DreamLearn logo, the title 'Design and Digital Marketing Tips | DreamLearn', the date 'Aug 22, 2026', and a brief description. Below the preview, the 'SEO title' is 'Design and Digital Marketing Tips | DreamLearn', the 'Slug' is 'blog', and the 'Meta description' is 'Get practical design and digital marketing tips, insights and ideas to build creative skills and stay updated with the digital world.'.
